On a Roll Clinical Centers:
400 East Fordham Road, 10th Floor
Bronx, NY 10458
25 Elm Place, 5th Floor
Brooklyn, NY 11201

On a Roll was developed and is led by
Jean Minkel, an internationally recognized
expert on seating and mobility.
Jean has received numerous awards
including the Fellow Award from the
Rehabilitation Engineering and Assistive
Technology Society of North America.
Too many people have poorly fitting wheelchairs that limit their mobility and undermine their health by causing muscle strain, pressure injuries, spasms, nerve damage, or other injuries.

*On a Roll* also does home assessments to ensure that the appropriate chair will fit through the doors, hallways and elevators of the user’s home.

*On a Roll* services are covered by Medicare and Medicaid.

---

**On a Roll**

*On a Roll* is a premier provider of specialized mobility assessments for people with physical disabilities conducted by expert occupational and physical therapists.

For many people with disabilities, having the right wheelchair is the key to protecting their health and maintaining their independence.

The “right” chair is one that is individually configured to meet a person’s needs and maximize health and independence.

---

**An On a Roll wheelchair or mobility device:**

- Starts with a thorough evaluation
- Considers physical condition, function and where the device will be used
- Fits properly to prevent pressure wounds
- Is tailored to meet the needs of each individual
